

In 2017 the **Silver State Chapter** is looking forward to landing some exciting new presenters. Currently, we have Robert Baird, CEO of ARMA International scheduled to present and we are very optimistic that we will also obtain Jason Baron, former Director of Litigation for the US National Archives and Records Administration, who is also an internationally recognized speaker and author. We continuously strive to acquire speakers, that will provide immediate value to our members in the changing conditions of our profession. Every year we also nominate a local charity to contribute to. This winter our charter was to warm the homeless, which was very successful. In August, the new board will decide on a new charity as we always look forward to giving back to our community each and every year.

We are also very proud to launch our newly updated website this year. We think that the Pacific Region as well as ARMA International would be proud of how we continue to move towards the latest technology, training and RIM trends..

We have been in the process of updating our by-laws to conform to the new ARMA format/template and hope to have this finalized in 2017.
